NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2014

1. **Company background**

Kamaljyot Investments Limited is a public company domiciled in India and incorporated under the provisions of the Companies Act, 1956. It is primarily engaged in activities of Investment Holding and Financing. The Company currently deals into interest rate arbitrage and stock option derivatives.

The Company received the Certificate of Registration on February 26, 1998 from Department of non-banking supervision (DNBS) of Reserve Bank of India (RBI) to commence/carry on the business of non-banking financial institution.

2. **Basis of preparation**

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under the Companies (Accounting Standards) Rules, 2006 read with the General Circular 15/2013 dated 13 September 2013 of the Ministry of Corporate Affairs in respect of Section 133 of the Companies Act, 2013, the relevant provisions of the Companies Act, 1956 and relevant Reserve Bank of India (RBI) guidelines, circulars and notifications. The financial statements have been prepared on an accrual basis and under the historical cost convention.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year except for the change in accounting policy explained below.

2.1 **Summary of Significant Accounting Policies**

(a) **Use of estimates**

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

(b) **Revenue recognition**

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Dividend income is recognized when the Company's right to receive dividend is established by the reporting date.

Interest income is recognized on accrual basis and based on time proportion, taking into account the amount outstanding and the rate applicable.

Gains and losses on sale of securities are recognized on trade date basis. Gains and losses on sale of securities are determined based on the average cost method of accounting.

(c) **Fixed Assets and Depreciation:**

Fixed Assets

Fixed assets are stated at cost, less accumulated depreciation.

Depreciation

Depreciation is provided on the straight-line method at the rate specified in Schedule XIV to the Companies Act, 1956.

(d) **Investments**

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments. However, barring certain strategic investments, all long-term investments are subject to diminution in value thereof, if any, with reference to market value on end of the year.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. If an investment is acquired, or partly acquired, by the issue of shares or other securities, the acquisition cost is the fair value of the securities issued.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments, determined separately for each investment. Such diminution or reversal thereof are charged or credited to Statement of Profit and Loss.

CIN: U65990MH1983PLC030597

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2014

2.1 Summary of Significant Accounting Policies (Contd.)

Investments in units of mutual funds are valued at lower of cost or net asset value declared by the mutual fund.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

The quoted securities held as current investments are valued at lower of cost arrived at average cost basis or market / fair value, computed category-wise.

(e) Option Derivatives

All derivatives are measured using the mark-to-market principle with the resulting gains/losses thereon being recorded in the statement of profit and loss. For derivatives which are outstanding as on the reporting date, the Company adopts a conservative approach and ignores the anticipated profit on such transactions and no credit is taken in the statement of profit and loss.

Initial margins paid for entering into the contract are disclosed in the Balance Sheet as Current Investments as it is represented by way of investment in units of LiquidBeEs (Mutual Fund). The dividend earned on such units of LiquidBeEs is further invested in purchase of additional LiquidBeEs. These LiquidBeEs are pledged as Margin for trading in Futures and Option Segment of NSE Niftyindex and have been disclosed as restricted investment. Also refer Note 23.

As on the reporting date, the profit/loss on open positions are accounted for as follows: Credit balance in the "Nifty Index" being anticipated profit, is ignored and no credit is taken in the statement of profit and loss.

Debit balance in the "Nifty Index" being anticipated loss, is provided in the statement of profit & loss.

On the final settlement or squaring up of contracts for equity index/stock futures, the profit or loss is calculated as difference between settlement/squared up price and contract price and disclosed in the statement of profit and loss under the head profit/loss on securities.

"Nifty Index/Stock Option Premium Account" represents the premium paid or received for buying or selling the options, respectively.

(f) Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

(g) Income taxes

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the company operates. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

CIN: U65990MH1983PLC030597

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2014

2.1 Summary of Significant Accounting Policies (Contd.)

At each reporting date, the company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each reporting date. The company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the specified period.

(h) Provisions

A provision is recognized when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, in respect of which, a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

(i) Cash and cash equivalents

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank and in hand and short-term investments with an original maturity of three months or less.

(j) Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The company does not recognize a contingent liability but discloses its existence in the financial statements.

(k) Measurement of EBITDA

As permitted by the Guidance Note on the Revised Schedule VI to the Companies Act, 1956, the company has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the statement of profit and loss. The company measures EBITDA on the basis of profit/(loss) from continuing operations. In its measurement, the company does not include depreciation and amortization expense, finance costs and tax expense.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2014

1. COMPANY BACKGROUND

Excel Bio Resources Limited ('the Company') is a public Company domiciled in India and incorporated under the provisions of the Companies Act, 1956 and is a wholly owned subsidiary of Excel Industries Limited. The Company is exploring business opportunities in the areas of renewable bio-resources, waste management, renewable energy and biotechnological processes.

2. BASIS OF PREPARATION

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under the Companies (Accounting Standards) Rules, 2006, (as amended) and the relevant provisions of the Companies Act, 1956, read with General circular 8/2014, issued by the Ministry of Corporate Affairs in respect of section 133 of the Companies Act, 2013. The financial statements have been prepared on an accrual basis and under the historical cost convention.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

All assets and liabilities have been classified as current or noncurrent as per the Company's normal operating cycle and other criteria set out in the Revised Schedule VI to the Companies Act, 1956. Based on the nature of products and the time between acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current/ noncurrent classification of assets and liabilities.

2.1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

(b) Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized.

Income from services are recognized as and when the services are rendered.

Interest income is recognized on accrual basis and based on time proportion, taking into account the amount outstanding and the applicable interest rate. Interest income is included under the head 'Other Income' in the Statement of Profit and Loss.

(c) Fixed Assets and Depreciation:

Tangible Assets

Tangible assets are stated at cost, net of accumulated depreciation.

Depreciation

Depreciation has been provided on written down value basis in accordance with Section 205(2)(a) of the Companies Act, 1956, at the rates specified in Schedule XIV to the Companies Act, 1956.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2014 (Contd.)

2.1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Contd.)

In respect of additions/deletions from the Fixed Assets, depreciation has been provided on pro-rata basis with reference to the date of addition/deletion of the assets except for assets costing ₹ 5,000 or less which have been fully depreciated.

	Schedule XIV Rates (WDV)
Plant and Machinery	13.91%
Computers	40.00%
Furniture and Fixtures	18.10%
Office Equipments	13.91%

(d) Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the year.

(e) Income taxes

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the *Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961*, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

(f) Provisions

A provision is recognized when the Company has a present obligation as a result of past event, it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2014 *(Contd.)*

2.1 **SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES** *(Contd.)*

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

(g) Cash and cash equivalents

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank and in hand and short-term investments with an original maturity of three months or less.

(h) Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

(i) Measurement of EBITDA

As permitted by the Guidance Note on the Revised Schedule VI to the Companies Act, 1956, the Company has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the statement of profit and loss. The Company measures EBITDA on the basis of profit/ (loss) from continuing operations. In its measurement, the Company does not include depreciation and amortization expense, finance costs and tax expense.
